

Interlapse Reports Strong Performance on Key Metrics From its Virtual Currency Platform

Press Release — April 7, 2020

Canadian-based FinTech applications company, Interlapse Technologies Corp. (TSXV: INLA / OTCQB: INLAF), reports strong growth from the Company's owned and operated, non-custodial, virtual currency platform, Coincurve.com.

In March 2020, Coincurve posted its best performing month with an increase of 163% in processed transactions and an increase of 60% in revenues, compared to the previous three-month average.

These results do not include any transaction volume or revenue from the recently announced acquisition of BuyBitcoinCanada.com on March 31, 2020, which is now being integrated into the Coincurve platform.

Considering that Coincurve is a relatively new enterprise, which launched on June 19, 2019 and currently serves only Canadian customers; the organic growth of the platform is extremely encouraging.

More importantly, the performance demonstrates the significant potential of the Company's revenue-generating model, paving the way for global expansion. On this point, and given the strong backdrop developing for virtual currency, the Company remains committed to executing its international expansion strategy.

About Interlapse Technologies Corp.

Interlapse Technologies Corp. is a FinTech applications company accelerating the global mega-trend of virtual currency adoption. Our signature product coincurve.com enables a simple, safe way to buy and spend Bitcoin and Bitcoin Cash.
